📍 Toronto, ON

SUMMARY

From the moment I produced "Hello World" in the console of my first application, I knew I was hooked on the world of web development. But Web Development has never been "just a job" for me, it's offered engaging challenges to continually learn and improve my skills in creating high-quality web applications. What started with a simple "Hello World" has become a full-fledged passion that only gets more exciting as the years go by.

PROJECTS

Pronia-Store

📅 2023
🔗 bit.ly/3Mea86T

- Designed and Developed a responsive static e-commerce website called pronia-store. This website is dedicated to the purchase of plants online and is built using the latest web technologies, including HTML5, CSS3, and flexbox.

Hulu Clone

📅 2021
🔗 https://hulu-clone-two-eta.vercel.app/

- A compact single-page application to browse and search for your favorite Movies and TV Shows. API provided by themoviedb.org. It was built using Next JS, Axios, Tailwind CSS, Flexbox

Covid-19 Tracker

📅 2021
🔗 bit.ly/c19_tracker

- #COVID-19 Tracker App This App shows live cases around the world. It is built using React, Hooks and Material UI, axios. In order to receive the live data, I integrated the https://disease.sh/ API.
